Manage and protect your devices,  
your apps, and your users

# Endpoint Management Workshop

*"Modern device management encompasses a wide range of areas including user protection, adding/removing devices, managed applications, end user support, and rolling out new capabilities."*

## -Forrester 2020 Microsoft 365 Enterprise Total Economic Impact Study

How are you managing your mobile devices, laptops, and other user endpoints? Do you know if your user's devices are compliant with your IT policies?

## Enable users to be productive, on any device, without compromising IT security

Today's users are looking for more ways to remain productive while working on any device. 95% of organizations allow personal devices in the workspace. All these devices add additional risks, when you consider that 70 million smartphones are lost every year.

With users asking for more ways to work the way that they want, this workshop will show you how to manage both company-owned and user-chosen devices in the cloud.

## Workshop highlights

Improve your Secure Score with Microsoft Endpoint Manager

Learn how to build management policies that protect your users, company data, and devices

Gain insights about your users' endpoints and their compliance with your IT policies

Determine the best way to give your users access to the apps they need on the devices of their choosing

## Why you should attend

Experience the power of modern device management within your own environment.

This workshop will show you how to leverage intelligent security, risk-based controls, zero-touch provisioning, advanced analytics, and deep integration to the Microsoft products you already use. By attending, you can:

**Learn** how to improve your management capabilities with Microsoft Endpoint Manager.

**Discover & Protect** your endpoints by enforcing policies and deploying security tools.

**Secure** your users' identities with multi-factor authentication & conditional access from any device.

**Enable** your users to be productive with the applications they need, on the devices they want.

*A commissioned study conducted by Forrester Consulting™ on behalf of Microsoft, June 2020*

## What to expect

Get an executive deep dive into remote deployment, management, and the security of corporate and BYOD devices in your organization. Our goal is to show you the best ways to manage endpoints at the enterprise level. We'll provide you with the ability to protect your authorized users' identities so you can authenticate credentials and manage access while still giving users the freedom to collaborate with others.

We'll work with you to:

- Learn how to improve your management capabilities with Microsoft Endpoint Manager
- Discover & Protect your endpoints by enforcing policies and deploying security tools
- Secure your identities with multi-factor authentication & conditional access from any device
- Enable your users to be productive with the applications they need, on the devices they want

## We'll customize the workshop based on your organization's needs

**Engagement  
Set up**

**Design  
and planning**

**Design Customer  
value conversation**

**Discovery  
session for  
endpoints**

**Key results,  
recommendations  
and next steps**

**Microsoft Endpoint Manager  
Baseline Security  
Device Config & Management**

## Who should attend

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Endpoint & Device Management owners/decision makers
- Application business owners
- IT Security
- IT Operations
- Security Architect
- Security Engineers

## Why Advanced IT?

When it comes to security and secure cloud solutions for your company, you need an experienced partner with referenced success stories.

Advanced IT is a leading provider of technology solutions and services with more than 10 years of experience in information security technology and services. Our offering ranges from licensing to consulting services for our customers, looking always for a good architecture, implementation, configuration and delivery of cloud and OnPrem solutions. We have the experience to support our clients throughout their technological roadmap in today's digital world and to be able to support them in digital transformation.
